Maxwell GeoSystems Reacquires ISO27001 Certification

Last week, Maxwell GeoSystems attained the ISO27001: 2013 - Information Security Management status and certification again. Our team of dedicated colleagues from the technical R&D centre took part in the audit, ensuring smooth operations and auditing process.

With an increase in cyber-attacks and security breaches in today's digital age, it has become critical for businesses to obtain the ISO27001 standard. The main areas that were audited included:

- Information Security
- Secure Communication Procedures
- Server Security
- Network Security
- Business Continuity
- Encryption and Cryptography
- Backup and Restoration Policies and Procedures

Achieving the ISO27001 certification shows Maxwell GeoSystems continuous drive for the development, security and safeguarding data of its MissionOS system and management processes.
