### MissionOS Fully Automatic Report Handling

Source: Visible construction data - MissionOS

Maxwell GeoSystems' **MissionOS** is operating fully automatic report handling in real-time on a major infrastructure project in Hong Kong.

Maxwell GeoSystems has installed its innovative **MissionOS Tunnel Data Management System (TDMS)** on the USD\$1.9bn~ Lam Tin tunnel project managing the communication of construction data to the client and key stakeholders. The project is a joint venture between Leighton & China State.

The TDMS compiles geology, geotechnics, real-time instrumentation and construction data within one easily configurable platform it provides a high degree of automation of reporting and connectivity to other platforms.

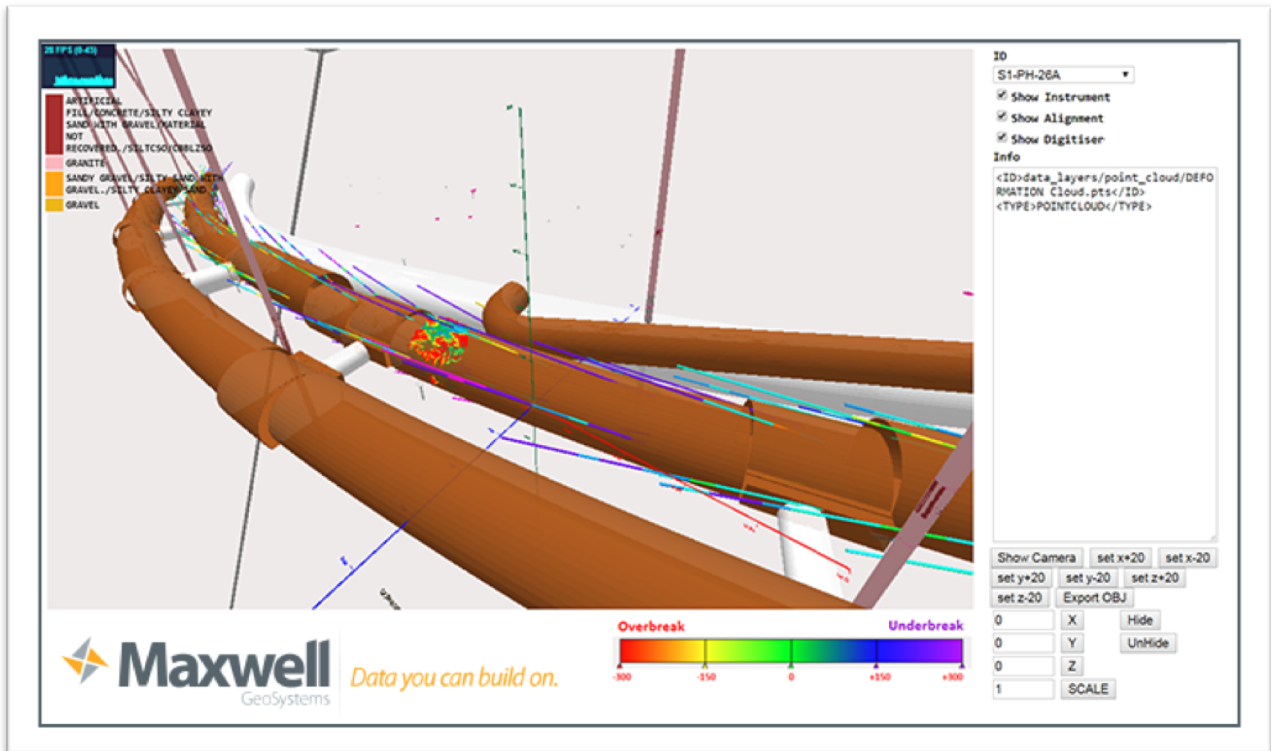

The project represents the 14th implementation of MGS's **MissionOS** in Hong Kong where it is fast becoming the essential backbone for delivering the HK Government's BIM strategy and is a significant resource for planning of future works.
