Maxwell GeoSystems leading the way in ConTech Expansion

Maxwell GeoSystems is at the forefront of the exponential growth in the construction technology (ConTech) sector, with a proven track record of successfully accomplished projects, along with strong demonstrable capability across a wide range of challenging environments.

Since Maxwell GeoSystems was founded in 2004, the company has grown globally and has actively been involved in major infrastructure, mining, construction and environmental projects in partnership with leading construction companies and consultants. The global project value Maxwell GeoSystems has been involved in is USD75 billion (2010-2020).

MissionOS is a powerful and flexible data management system for the acquisition, monitoring and analysis of geotechnical and other project-related data. In a world where paper is becoming a thing of the past, Maxwell GeoSystems is leading the way in embracing digitalisation, which is why MissionOS is a real breakthrough in construction data.

See how the 100% configurable cloud-based MissionOS software is being used on signature projects across the world, where clients are experiencing the full benefits of the platform, with data being delivered in real-time.
