Rapid Excavation and Tunnelling Conference

RETC Event Talk - Digitalisation in Tunnel Construction

Dr. Jacob Grasmick will be attending the RETC Event in Las Vegas, where he will giving a live talk on quantifying tangible and intangible benefits of digitalisation in tunnel construction, on the 14th of June 2021.

With the tunneling industry continuing to adopt Tunnel 4.0, digital twins of the tunnel construction sites are becoming standard requirements for projects, but the benefits of these remain unproven to many practitioners.

He will be touching upon real examples to describe where opportunities are taken and where they went unrealised, along with the challenges and considerations that need to be taken into account, for both procuring and developing of these digital twins.
